

Hello All!

A seasonal notice for you.

Dr Forwell has a safer, more natural alternative to the standard flu shot.

It's also a shot, but it's homoeopathic designed especially for viral infections (influenza, etc). It works by stimulating the body's own defenses without exposure to the viral or bacterial particles found in conventional flu shots.

The injection can be followed by an oral homeopathic that you take on your own once a week for a month or so.

The visit takes about 10 minutes and the cost of the protocol is \$30. It is intended for use by anyone over the age of 2 years.

Favorable side effects such as relief from headaches and mild allergies have been noted!

Call to schedule your shot today!
